Getting started with the classic Jupyter Notebook

Installation with mamba or conda

The classic notebook can be installed with `mamba` and `conda`.

```
mamba install -c conda-forge notebook
```

or

```
conda install -c conda-forge notebook
```

Installation with pip

If you use `pip`, you can install it with:

```
pip install notebook
```

Congratulations, you have installed Jupyter Notebook! To run the notebook, run the following command at the Terminal (Mac/Linux) or Command Prompt (Windows).

```
jupyter notebook
```

See [Running the Notebook](#) for more details.
